Radio Astronomy and the Journal of Astronomical History and Heritage

While the Journal of Astronomical History and Heritage publishes papers, IAM reports, and book reviews on a range of topics, the history of radio astronomy is of special interest. Papers published to date are:

Davies, R.D., 2008. A history of the Potts Hill radio astronomy field station. 8(2), 87-98.

Davies, R.D., 2008. Recollections of two and a half years with "Chris" Christiansen. 12(1), 4-10.

Swarup, G., 2005. From Potts Hill (Australia) to Pune (India): the journey of a radio astronomer. 9(4), 21-33.

Book reviews and reports of the IAM Working Group on Historic Radio Astronomy have also been published in the Journal. Unsolicited papers and book reviews are always welcome, but first please email the Editor (Wayne.Orchiston@cu.ed.ac.uk) for further information and for a 'Guide to Authors'.
